

# This is a demo of movies in DocOnce

HPL

Jun 5, 2016

Here is a movie in WebM format.

Movie 1: 1D wave in WebM. `../doc/src/manual/mov/wave.webm`

Here is the same movie in Ogg format:

Movie 2: 1D wave in Ogg. `../doc/src/manual/mov/wave.ogg`

Here is the same movie in MP4 format:

Movie 3: 1D wave in MP4. `../doc/src/manual/mov/wave.mp4`

Here is the same movie in Flash format:

Movie 4: 1D wave in Flash. `../doc/src/manual/mov/wave.flv`

And here is a collection of images shown as an animation (`frame_*.png`):

Movie 5: Animated collection of images.

Here is the same collection, but with images in cyberspace, given as URLs:

`http://hplgit.github.io/animate/.../frame_%04d.png:80->129`

Taking images to animate from cyberspace.

`http://hplgit.github.io/animate/doc/pub/mov-animate/frames/frame_%04d.png:80->129:`  
load `movie_player1.html` into a browser

Movie 6: Taking images to animate from cyberspace.

The movie above in MPEG format, typeset in a box:

|  |
|--|
| Movie 7: 1D wave in MPEG. <code>../doc/src/manual/mov/wave.mpeg</code> |
|--|

Here is the same movie in AVI format:

Movie 8: 1D wave in AVI. `../doc/src/manual/mov/wave.avi`

Here is the same movie, but with a URL to GitHub:

Movie 9: `http://hplgit.github.io/animate/doc/pub/mov-animate/demo.ogg`

Here is a YouTube video:

`http://www.youtube.com/watch?v=_07iUiftbKU`

Movie 10: YouTube movie.

And a vimeo video:

`http://vimeo.com/55562330`

Movie 11: Vimeo movie.

Finally, let us demonstrate referencing the movie ??.
